Profile

A highly motivated data analyst with 5+ years of professional experience in reporting and data analysis, specializing in creating data-driven insights through tools like Power BI, SQL, and Python. Proven ability to deliver actionable insights through interactive dashboards, financial forecasting, and data modeling. Currently pursuing a Master's in Data Science at the University of Essex to further enhance skills in machine learning and advanced analytics for dynamic problem-solving. Fluent in English, Turkish, and some French, I'm a strong communicator and influencer. My passion for data and mahcine learning, coupled with my analytical mindset, makes me a valuable asset in delivering data-backed industry strategies.
